PROFESSIONAL PROFILE

My experience as a Real Estate Agent opened my eyes to economics and financial markets, while instilling a strong goal-oriented mindset. That passion for markets led me to invest independently, and the growing need to automate my strategies pushed me to learn programming. From that point on, I fell in love with software development. What started as a practical tool became a genuine vocation: I have since dedicated myself entirely to the field, working across automation, data, and real-time 3D development. For me, it is not just a career, it is a passion.

WORK EXPERIENCE

Unreal Engine Publisher & Freelancer | Self-employed

July 2022 – Present • Remote

- Commissioned projects in both programming (C++/Blueprints) and 3D rendering/design.
- Development and publishing of 2 commercial products on the Unreal Engine Marketplace (75,000–100,000 lines of code per product).
- Customer support and issue resolution for published products.
- Project planning, time management, and delivery of freelance work to client specifications.
- Continuous self-updating on new technologies, engine releases, and industry standards.
- Independently managed every phase of the pipeline: planning, production, and distribution.
- Published plugins include a custom Virtual Machine Ability System (GAS alternative) and an Inventory System with anti-cheat and client prediction, both built for multiplayer compatibility.
- Maintained a 5-star rating across all published products.
